

Slim Line case wrapping machine

The Slim Line Case Wrapper ADR4000CD-SL is designed to provide a professional wrapping with a low cost investment. The ADR4000CD-SL is a table top machine dedicated to small or medium production for CDs or CDRs. The ADR4000CD-SL works with 5.2 and 7mm Slim cases. A stack of 100 pre-cut sheet of cello is placed on the manual platform. The slim box to overwrap is placed on the stack of cello sheet, and the operator moves the heater to seal the front of the box.

The side folding and sealing is fully automatic. The capacity for the first semi-automatic operation is 250 per hour, and the capacity of the automatic side sealing operation is 500 per hour. The sealing temperature is electronically controlled and can be set to the desired value. An electronic security stops the machine in case of wrong operation.
